Surfaces

CARE & MAINTENANCE

CARE & MAINTENANCE

VICOSTONE® Surfaces are high-quality, solid, non-porous products that resist scratches, heat, and stains. However, VICOSTONE® Surfaces are not heat, stain and scratch proof. VICOSTONE® Surfaces require minimum maintenance and the following care and maintenance guide will help you to keep the surface in immaculate condition for years.

RESISTANCE TO SCRATCH

VICOSTONE® Surfaces are highly resistant to scratches. However, to keep the surface in immaculate condition, always use a cutting board for food preparation. Never cut directly on countertop.

HEAT TOLERANCE

Sudden or protracted exposure to high temperatures will damage the surface. It is recommended that pot pads or trivets be placed on the surface under appliances such as electric frying pans, crock pots, or roaster ovens.

MINIMAL MAINTENANCE

Daily cleaning: soap and water or a mild detergent with Soft Scrub recommended.

Spills should be wiped up immediately.

Note: Surfaces in special finishes may require increased daily maintenance due to having a more textured surface.

MAINTENANCE FOR SPECIAL FINISHES

Surfaces in special finishes (including honed, leather, eggshell and brushed finishes) require additional daily maintenance and care.

Any dirt, markings, and scratches will be more obvious on a special finish surface. These markings can be removed by using non-abrasive cleaning products such as **Soft Scrub® with Bleach Cleaner Gel.**

DAILY CLEANING

Step 1: Wipe your counters by soft sponge or dishcloth with warm water (Mild dish soap acceptable)

Step 2: Rub off dried gunk if needed.

Step 3: Wipe off grease using gentle liquid cleaner.

Step 4: Rinse off the surface with wet towel or sponge.

TOUGH STAIN CLEANING

Step 1: Take a non-abrasive cloth with rubbing recommended detergents (see chart next page).

Step 2: Rub the stain and let it sit for a few minutes.

Step 3: Wipe the counter again using just warm water.
